

# Wind roses for 2006 and 2010 – Berkshire, England

The software used was WindRose PRO3 from Enviroware s.r.l ([www.enviroware.com](http://www.enviroware.com))

## 2006

## 2010

- 2006 was a very warm year, mean temp 11.3°C, 1.5 degC above the 1971-2000 normal
- 2010 was a very cool year, mean temp 9.4°C, 0.4 degC below the 1971-2000 normal

Wind roses are based upon hourly mean winds. Note the scales differ on the two wind roses.
